Growth in Students/Pupils

Explanatory notes:

This chart reflects persons entering the nursing profession (as students/pupils) for the first time and does not include those busy with bridging or supplementary basic programmes.

When seeking to interpret the information in this chart please remember two important considerations:

1. These figures represent changing populations – there are complete intakes each year followed by terminations (for various reasons) and completions of large groups (usually from previous years).
2. The normal duration of training is different for the three categories – 4 years for Students, 2 years for Pupils and 1 year for Pupil Nursing Auxiliaries.
