TERMS OF REFERENCE

REQUEST TO APPOINT A CONSULTANT TO CONDUCT THE NURSING PRACTICE/TASK ANALYSIS FOR LICENSURE EXAMINATION OVER EIGHTEEN (18) MONTHS PERIOD

1. PURPOSE

- 1.1 The purpose of this bid is to appoint a qualified and experienced consultant to conduct the nursing practice/task analysis in South Africa and ensure representativeness/ inclusiveness in terms of geographical areas, categories of nurses and areas of nursing practice for a period of eighteen (18) months.

2. BACKGROUND

- 2.1 The South African Nursing Council (SANC), is a statutory body which functions in terms of the Nursing Act, 2005 (Act No. 33 of 2005). It has a responsibility to establish, improve, monitor and control conditions, standards and quality of Nursing and Midwifery Education and Training within the ambit of any other applicable law. To fulfil this function, the SANC also accredits nursing education institutions and nursing programmes. SANC also approves clinical facilities used for experiential learning.
- 2.2 Education and training in South Africa is offered in Universities, Public Colleges and Private Nursing Education Institutions (NEIs).
- 2.3 Due to the changes in the education landscape in the country, the SANC is also in transition from the legacy nursing qualifications to the new nursing qualifications which are aligned to the Higher Education Qualifications Sub-framework (HEQSF).
- 2.4 SANC does not conduct the licensure examination as yet, however, SANC conducts certain examinations for private and public nursing colleges (for some programmes). Universities conduct their own examinations. Professional Registration into all categories of nursing is based on the academic certificates and transcripts submitted by the NEIs hence the SANC has resolved to adopt a licensure examination at this time of transformation of the nursing education and training.
- 2.5 Many countries including some developing countries in Africa have adopted the Licensure examination. In the process of benchmarking and extensive review of the literature, SANC saw the need to start with conducting the nursing practice/task analysis in order to ensure that the licensure examination is based on the context and is psychometrically and legally defensible. To achieve this, the Council approved that a consultant be commissioned to conduct the nursing practice/task analysis that will inform the blue print of the licensure examination.
- 2.6 The Nursing education and training system in the country produces qualifications through programmes of study from undergraduate to post graduate levels and these qualifications yield professional registrations as stipulated in the Nursing Act (Act No. 33 of 2005) section 31.
- 2.7 Table 1. below illustrate new and legacy nursing qualifications with the categories yielded by each qualification. This will assist the understanding of the two (new and old programmes) because

currently there are no graduates/completed students from the new nursing programmes necessitating that the nursing practice/task analysis project be conducted on graduates from the old programmes (including the recently completed students from the Higher Certificate in Nursing programme) to inform the licensure examination.
